PROFESSIONAL SUMMARY

- Detail-oriented and passionate Frontend Developer with over 2 years of experience in building responsive and user-friendly web applications. Proficient in leveraging modern frameworks and libraries, with a solid foundation in UI/UX design principles. Adept at collaborating in fast-paced environments and delivering high-quality projects on time.

EDUCATION

- **Chitkara University** Punjab, India
• *Bachelor of Engineering - Computer Science Engineering*

TECHNICAL SKILLS

- **Programming Languages:** C, C++, JavaScript, SQL, Dart, TypeScript
- **Frameworks & Libraries:** React, React Native, Flask, Scikit-learn, GSAP, Three.js, Next.js
- **Tools & Technologies:** Node.js, Express, Mongoose, MySQL, Git, Vercel, Render
- **Platforms:** Linux, Windows, Web Development
- **Soft Skills:** Leadership, Event Management, Team Collaboration, Problem Solving

PROFESSIONAL EXPERIENCE

- **Development Manager** ShipMyMeds (Reliver PVT LTD)
• *June 2023 - Present*
 - **Responsibilities:** Developed a startup website for psychology master's students, enhancing internship placements and patient access.
 - **Team Management:** Managed a team of developers, overseeing project timelines, code reviews, and quality assurance.
 - **Technology Utilization:** Utilized technologies such as React, Node.js, and MongoDB to deliver high-performance web applications.

PROJECTS

- **Startup Website (Reliver):** Built a platform facilitating internship placements for psychology students, directly connecting them to patients.
- **3D Interactive Website (Fizzi):** Developed an engaging 3D website using Three.js, GSAP, Next.js, and TypeScript, enhancing user experience through immersive design.
- **Weather Application:** Designed a weather app featuring a modern UI and real-time weather data, incorporating sound functionality for enhanced user engagement.
- **Android Application (Samzanxo):** Created an Android app utilizing the Pixabay API, enabling users to browse and download high-quality wallpapers effortlessly.
- **Face Detection Platform:** Engineered a face detection web application using TensorFlow.js, processing over 1,000 visual inputs per minute through optimized algorithms.

APIs DEPLOYED

- **Pixabay API (Samzanxo):** Enabled a wallpaper gallery for browsing and downloading high-quality images.
- **Weather API:** Provided real-time weather data with an engaging user interface.

HONORS AND AWARDS

- Winner of 18 district-level drawing competitions and 4 state-level competitions.
- Protshahan Relay Hackathon - Winner, February 2023.
- Byte Tournery Relay Hackathon - Winner for Best Website Design, February 2024.

HOBBIES

- **Designing websites**
• *Exploring new technologies and developing unique projects for personal and professional growth.*
- **Creativity**
• *Aiming to create unique development projects for personal growth.*
